- **Master Plan Workshop: Architecture/Preservation and Historic Overlay Discussion**
  
  o Michaela Accardi and Rachel Falkenstein led a presentation about the possibility of adding a historic overlay to the historic neighborhoods in and around Downtown Crozet that would allow greater density in older neighborhoods around downtown in creative ways:
  
  o “Given the proximity to downtown, desire to promote a mixture of housing types and affordability, provide walkability, and preserve character and affordability of existing historic neighborhoods, staff recommends allowing density above the 3-6 units/acre guidance under the following circumstances:
    
    - Conversion of an existing structure to a multi-family unit to allow preservation of existing housing stock and/or historic buildings.
    - Addition of a detached accessory dwelling unit on a lot in keeping with existing development patterns including building location, scale, and massing.
    - Infill development that
      - preserves existing housing stock;
      - is in keeping with the prevailing development pattern of the surrounding neighborhood including scale, massing, and building location;
      - provides additional affordable and/or workforce housing opportunities;
• can include the following housing types:
  • single family detached
  • duplexes
  • fourplexes
  • multiplexes
  • bungalow courts

  o Committee members discussed the potential implications of the historic overlay. Some voiced concerns that adding density in these areas would further strain infrastructure—which is already lacking—in the area. Some thought that the added regulations could hinder affordable housing. Others thought they were a creative way to encourage new, affordable development that is in-line with existing neighborhood patterns.

• **Master Plan Workshop: Site-Specific Land Use Changes**
  o Andrew Knuppel gave a brief overview of some site-specific Master Plan changes that staff is looking at:
    ▪ White Gate Farm between Wickham Pond and Western Ridge, which is currently labeled as rural/greenspace under the Master Plan; and
    ▪ Property on the northeast side of the intersection of Route 250 and Crozet Avenue
  o The Committee will have a more in-depth discussion of these designations and potential changes at a future meeting

• **The meeting adjourned at 8:43 pm.**
